

Fermob

“The ‘joie de vivre’ is everywhere!”

Fermob – France’s No 1 manufacturer of metal outdoor furniture – out on the terrace, up on the balcony and in gardens all over the city! Indoors and out, in spaces large and small...

Clifton Nurseries stock a core range of Fermob Furniture, see below, but we can also order you anything from the Fermob catalogue in any of the 25 colours available. Please see us in store or check out the Fermob website www.fermob.com for more inspiration!

We will also always have a stock of other colours, although not in the same quantities as those above.

We can order in any colours from this colour chart.

Technical Information

Fermob Treatments

Anti-corrosion coating and lacquer:

Fermob furniture receives a very high protection treatment so that it can be used outside in all weathers.

High Protection Treatment Index 13: during the 13-stage process exclusive to Fermob, the metal (steel or aluminium) receives an anti-corrosion treatment and is then coated electrostatically with a 100 % polyester baked anti-UV DUPONT[®] powder coating.

This produces excellent results for aluminium but can be further improved for steel using electrophoresis giving a Very High Protection treatment Index 22 - a process involving the use of 18 treatment baths.

Outdoor Technical Fabric:

OTF is a 100 % polyester PVC coated tear-proof fabric which really lends itself to outdoor use.

Unaffected by UV rays. Stays fresh. Anti-mould treated. No need for cushions!

Can be cleaned with soap and water.

If you live within a few miles of the coast (saline conditions)

we recommend selecting products with Index 22

Anti-rust treatment for added protection.

Index 13 process
