

Iota

Stylish contemporary planters with the beauty and strength of real granite; Beautiful natural stone has been used to create a range of granite planters perfect for the modern garden. Made from cut slabs of solid granite, these planters are extremely strong and designed to stand the test of time. Their surface is polished to a mid-shine. Granite planters make a statement at an entrance, and their clean lines and dark colour particularly suit formal gardens and hard landscaping. Simple planting looks best: topiary, specimen and architectural plants all work well.

Iota

The warm bronze and coppery coloured tones of these Slate planters acts as a great foil for all kinds of foliage and floral colour. The look is natural but smart, and with their simple squared shapes these garden pots suit contemporary and traditional settings equally well.

Each planter is unique - slate has a naturally uneven surface, and differences in tone and texture mean that every piece is individual. So, if you order a number of slate planters, we'll do our best to match the stone, but some variation is to be expected.
