

## Yorkshire Flower Pots

All Yorkshire Flowerpots' products have been manufactured using local Yorkshire clay from their own quarries from 1890 to the present day.

Their pots and planters are fired to temperatures in excess of 1050 degrees centigrade for up to 5 days making them frostproof to temperatures of minus 15 degrees c.

All of the products are handmade by skilled craftsmen combining over a century's skilled experience with state of the art production technology.
